EDUCATION

PARUL UNIVERSITY — **Vadodara, Gujrat, India**
BTECH CSE — *July 2021 - June 2025*
B.N.N COLLEGE — **Bhiwandi, Maharashtra, India**
HSC — *July 2019 - April 2021*

TECHNICAL SKILLS

Programming Languages: Java, C++, C,Dart,Kotlin,PHP,JavaScript
Software Tools & Frameworks: Flutter, Laravel, Node.js, Express.js, MySQL, MongoDB, Firebase,Supabase,Android,Ios

WORK EXPERIENCE

Flutter Developer
Appdid Infotech LLP, Maharashtra, India — *March 2025 - Now*

- Worked as a Flutter Developer contributing to 27+ live projects across e-commerce, logistics, quick commerce, healthcare, and gaming domains.
- Independently designed, developed, and published 5 full-scale applications from scratch on both Android and iOS platforms.
- Handled maintenance, bug fixing, performance optimization, and feature enhancements for multiple existing production apps.

PROJECTS

- **VillageWheels – Quick Commerce Platform**,
  Built a 3-app ecosystem (User, Delivery Partner, Vendor) using Flutter.
  Implemented real-time order tracking, vendor management, and delivery workflows.
  Achieved 3,000 downloads, making it one of the fastest-growing new apps. Try it!
- **Pkup – Truck & Logistics Booking App**,
  Developed a Porter-like logistics solution with separate User and Delivery Partner apps.
  Implemented booking flow, order lifecycle management, and live status updates.
  Published and maintained the app on both platforms. Try it!
- **MedMe – Multiplayer Quiz & Gaming App**,
  Built a real-time quiz battle system allowing random and friend-based matches.
  Designed multiplayer logic, matchmaking, and game state handling.
  Focused on performance and smooth in-app experience.

PERSONAL PROJECTS

- **Planify – AI Travel Planner**,
  Built an AI-powered travel planning app using Flutter, Firebase, and Google Gemini AI.
  Generates personalized itineraries in 4 simple steps, improving trip planning efficiency. Try it!
- **E-Commerce App**,
  Built a scalable e-commerce app with wallet, cart, and payment features.
  Integrated Stripe API for secure payments and Firebase for authentication and data management. Try it!
- **GeoVision – AI Location Intelligence Platform**,
  Developed using Flutter, Node.js, MongoDB, Firebase ML, and Gemini AI.
  Provides AI-driven reports on demographics, competition, and business feasibility using Maps APIs.

ACHIEVEMENTS

- Solved 750+ questions on LeetCode.
- Earned 25+ badges on LeetCode.
- Maintained a 409-day continuous LeetCode coding streak.
- Worked on 30+ projects
- Secured a Top 10 position at the BITS Pilani Hackathon,competing against teams from multiple institutions.

CERTIFICATES

- **C Programming Certificate** - I Dream Classes
- **Police Hackathon Participation Certificate** - PARUL UNIVERSITY
- **BITS APOGEE Hackathon Certificate** - BITS Pilani
